

Stefano Ferraina, MD, PhD. Dr. Stefano Ferraina received the MD and PhD degrees (the latter in Neurophysiology) from Sapienza University. After completing residency and fellowship training in Neurology at University of Ancona, Italy, and University of Rome, he spent two years, 1997-1999, as Visiting Scientist at the Laboratory of Sensorimotor Research, NIH, Bethesda MD, USA. Thereafter, he moved to the Dept. of Physiology and Pharmacology at Sapienza University, Rome. Currently, he is full professor of Neurophysiology. Area of expertise: basic and clinical neurophysiology, neuroanatomy, neural bases of visuomotor transformations, single unit activity, multiunit activity and local field potential recording in behaving monkeys, neural population decoding, neuropsychology, brain stimulation methods, neural network models. He

received a Marie Curie Award in 1995 and a Human Frontier Scientific Program award in 1997. Associate Editor for *Frontiers in Neuroengineering*. Referee for *Nature Review Neurosci.*, *J. Neurosci.*, *J. Neurophysiol.*, *Exp. Brain Res.*, *Neuroscience*, *Cerebral Cortex*. To date, SF publications have accumulated more than 3200 citations.
